

How big is Ukraine's gas storage facility?

Constructed during the Soviet era as part of the infrastructure to support Russian gas deliveries to European markets, Ukraine's gas storage facilities have an overall capacity of 31 billion cubic meters.

Should Ukraine invest in underground gas storage facilities?

Ukraine's underground gas storage facilities are the largest in Europe and offer extensive untapped potential. In order to make the most of this potential, however, considerable international investment will be necessary along with guarantees to cover war-related risks.

Where is Slovenia's first used fuel dry storage facility?

We are proud to announce the commissioning of Slovenia's first used fuel dry storage facility at Krško Nuclear Power Plant in Slovenia. Ukraine National Nuclear Energy Company "Energoatom" is poised to begin moving used fuel from the nation's operating reactors to its newly built Central Spent Fuel Storage Facility starting in 2022.

How many cubic meters of gas can Ukraine Transport per day?

Today, Ukraine has the potential to distribute up to 200 million cubic meters of gas per day to EU markets. The real logistical challenge lies in the limited capacity to transport large volumes of gas in the other direction from the EU to Ukraine's storage facilities. Present capacity provided by Slovakia, Hungary, and Poland is inadequate.

Will Energoatom and Holtec develop a joint venture in Ukraine?

Energoatom and Holtec have plans to create a joint venture enterprise to develop a manufacturing and technology centre in Ukraine to localise production of equipment for the storage and transportation of used nuclear fuel and also for equipment for Holtec's small modular reactor.

Crowley has your back when it comes to designing, constructing, commissioning and operating bulk fuel storage solutions. Whether your need is best accomplished through contractor-owned and -operated facilities or a government-owned, contractor-operated service, Crowley brings decades of proven expertise to your mission.

The facility is expected to save Ukraine \$200 million annually through avoided payment to the Russian Federation for transport and storage to that country. According to a ...
