

Who is genpower jenerat&#246;r?

Genpower Jenerat&#246;r delivers the energy solutions that you need to you in the fastest way, thanks to the relationship it has built with its business partners and suppliers on trust over the years. With Genpower Generator, forget everything you have ever learned about generators. Enjoy the Silence with our canopy models!

What services does genpower generator offer?

Genpower Generator offers installation,assembly and commissioning consultancy and supervisionfor the areas where its products will be used. Please consult us before making a decision for difficult field conditions such as limited area of use.

How does genpower contribute to the Turkish Industry?

We continue to contribute to the Turkish Industry with both export and R&D investments,with our factory built on a land of 219.000 square meters. We thank all Genpower friends and wish our love to last forever.

How does Saharan wind work?

Saharan wind regularly intensifies during nighttime periods, in each season. Anti-correlations between integrated solar and wind resources improve the smoothness. The total output power loss at an optimal resource combination is low. wind turbines have a hub height between 80 and 120 m).

How strong is the wind over the Sahara?

Wind speeds at 100 m height over the Sahara are as strong as over open sea. Spatial correlation lengths for the wind fields are extremely large. Saharan wind regularly intensifies during nighttime periods,in each season. Anti-correlations between integrated solar and wind resources improve the smoothness.

Why do flow fields have large coherent structures over the Sahara?

Indeed,the flow fields exhibit very large coherent structures,particularly over the Sahara. Such wind velocity patterns are strongly related to the continental scale westward and northward dust transport[34,35 ]. Fig. 3.
