

Do you need a license to install solar panels in Georgia?

In Georgia, a solar installer must be associated with a licensed electrical contractor. You can find out if an electrical contractor has the required license at the Georgia Secretary of State's website. Financing options Not everyone has thousands of dollars to spend on a solar panel installation.

How do I choose a solar company in Georgia?

Solar companies that are licensed, insured and hold certifications take their business seriously. Look for companies that have NABCEP Certified professionals or certified electricians on staff and are properly insured, so their workers, and you, are protected. In Georgia, a solar installer must be associated with a licensed electrical contractor.

How much does a 6 kW solar system cost in Georgia?

A 6 kW solar system will cost about \$13,980 in Georgia before incentives. After the 30% federal solar tax credit, this drops to \$9,786, or about \$1.63 per watt. The total cost of a solar system will vary depending on the company you choose, the size of the system, the equipment installed and how you finance it.

Does a solar installation company offer a warranty?

Any reputable solar installation company will offer a workmanship or labor warranty that covers any damages that may occur during the installation process. We recommend using an installer with at least a ten-year labor warranty. Some installation companies, like SunPower, include a system performance guarantee.

Are solar incentives a good idea in Georgia?

Solar incentives and rebates can cut the cost of installing solar in Georgia by thousands of dollars. The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage.

Sunpath was founded in 2023 by Seth Gunning. The solar panels produce more electricity than the utility needs and the surplus is sold to Georgia Power. The projected total savings over the next 25 years are approximately \$5.5 to \$6 million. The solar project has benefitted the CWWC's operations, and set an example for other water and sewer utilities to follow.

Solar. The solar panels on your roof or some other structure such as carport produce electricity in what is referred to as Direct Current (DC). The appliances in your house, however, run on what is known as Alternating Current (AC). So in order to connect the DC from the solar panels to the house AC you at some point have to convert DC to AC.
