

Gibtelecom runs a data center called Mount Pleasant and has opened a second facility in February, in Gibraltar's new World Trade Center. This gives the newly created Rockolo some 17,200 square feet of data center ...

This secures Gibraltar's energy supply economically, environmentally and sustainably. The associated closure of the three old plants represents the largest measure taken to improve air quality and reduce greenhouse gas emissions. The new power plant consists of six engines; 3 of which run on natural gas and 3 of which are dual fuel.

The Gibraltar Electricity Authority would like to provide the general public with an update in relation to the New Power Station. The New Power Station has been undergoing commissioning now for some time, as part of our needs to satisfy ourselves that the plant will be resilient under any given condition, and provide us with the ability to supply you, our ...

Gibraltar has been a solid resource for our Citrix demands since 2015! Their team is very knowledgeable and they always go above and beyond whenever required. Gibraltar took the time to understand our business needs and implement ...

Once complete, the new power station will replace Gibraltar's three existing facilities and ensure sustainable power supply for decades to come. Getting here has been a tortuous process that started in 2007 and involved major technical work to assess the site and properly evaluate the scheme's environmental impact.
