

Will Greece become a net exporter of energy?

There are multiple high profile electricity interconnector projects in discussion, with two aiming to connect Greece with Egypt for the purpose of exporting renewable energy into Greece and beyond. As Greece further develops these projects, it positions itself to become a net exporter of energy in the region.

Why is energy production and storage important in Greece?

Energy production and storage is crucial to integrate renewable energy sources into the Greek electricity system, with a goal of having battery storage capacity of 3.1GW by 2030.

Is Greece a potential energy hub?

The Greek government is positioning Greece as an eventual energy hub for the Balkan region and Europe. Greece will submit an updated energy and climate plan to the EU in June 2024 which will reflect its continued commitment to increasing RES production.

Is Greece a potential energy hub for the Balkans?

Power produced by renewables and hydroelectric plants accounted for 57% of Greece's energy mix, an 8.5% rise from 2022 according to the country's Independent Power Transmission Operator IPTO. The Greek government is positioning Greece as an eventual energy hub for the Balkan region and Europe.

What is PPC renewables doing in Greece?

o 467MW hydroelectric project with energy storage capacity of 9,646MW at northern Greece, Sfikias area, Imathia - managed and operated by PPC Renewables. o 156MW energy storage from hydroelectric plant of 150MW at western Macedonia, Mavropigi area, Kozani - managed and operated by PPC Renewables.

Will Greece be able to trade oil-burning plants for cleaner energy?

Greece is working on a 4.3 billion Euro project to help islands to trade their oil-burning plants for cleaner energy. By 2030, Greece hopes to connect nearly all its islands to the mainland's grid using undersea cables that cross the Aegean and beyond.

The energy transition in Greece is progressing rapidly, with ambitious targets set for 2030 in the National Energy and Climate Plan (NECP), which is currently under public consultation. The country aims to increase the share of renewable energy sources (RES) in its final energy consumption to 45% and achieve an 80% share of RES in electricity ...
