

For example, prior to the retrofit, Guam Energy Office many times managed their usage and kept their lights off during the day - but the energy audit report assumes they would be on. The report benchmarks what it would be if the lights were operating and compares the savings by replacing with more efficient lighting, occupancy switches, and ...

The pattern of energy production and use in Guam is shaped by its location, a remote island. Almost all energy is reliant on imports of petroleum products for use in transport and electricity. Guam has no domestic production of conventional fuels such as oil, natural gas or coal. Its economy is dependent on the import of gasoline and jet fuel for transport and residual fuel oil for electricity. One third of electricity produced is used in commercial settings including the leading industry of touri...

The Guam Energy Office has been the managing agency of Guam's Weatherization Assistance Program since the program launched in 2010. Guam continues to reach income-eligible residents through outreach and education as well as direct collaboration with other government agencies that provide services to qualifying families. Despite ...

Successful commissioning projects rely on the application of Good Engineering Practices (GEP), and ICO takes great pride in the expertise and attention to detail we bring to every job. Our approach to cGMP and GLP ensures the successful execution of facility qualification in manufacturing and laboratory environments.

ENERGY ANALYSIS. A method for estimating the annual energy use of the proposed design and standard reference design based on estimates of energy use. ENERGY COST. The total estimated annual cost for purchased energy for the building functions regulated by this code, including applicable demand charges. ENERGY RECOVERY VENTILATION SYSTEM.
