electricity tariff. ... storage tanks - and multiple energy bills. Power, light and heat your home with cleaner energy ...

A heating system only ever needs to replace the amount of heat lost from your property. The more heat it loses, the more electricity is needed to power the electric heating system. This electricity also needs to be paid for - so insulating a property is also a brilliant long-term investment that could save you thousands of pounds in running costs.

The import cable alone does not meet the islands electricity needs when energy demand is at its greatest. The GJ1 cable can provide 100% of Guernsey's energy needs in summer and around 75% in winter, so the power station is still required as both a top-up for the winter peak periods and as a back-up when the GJ1 interconnector requires to be switched off for maintenance.

From April 2024, we'll be helping Guernsey get energy smart with our new paid-for service. Because there are better things to spend money on than electricity you don't use. Your energy matters, and Guernsey Electricity's team will help you unlock meaningful energy savings with eco-friendly solutions tailored to your home and lifestyle.
