

Why do we need solar power in Guinea?

to exploit Guinea's solar power potential in order to diversify the country's energy mix and increase the availability and reliability of power.

What is the first grid-connected solar PV array in Guinea?

The solar energy facility will be the first grid-connected solar photovoltaic (PV) array in Guinea. The project is being developed by InfraCo Africa with the support of Aldwych Africa Developments Ltd, in partnership with experienced French solar PV developer, Solvéo Energie S.A.S, a subsidiary of Solvéo Developpement.

Does Guinea have an electrification rate?

Guinea's has a national electrification rate of 35.4%. The West African country is looking to increase its electrification rate to meet its developmental goals, as well as diversify its energy mix. Guinea's existing electricity supply is largely derived from hydro power which can be susceptible to seasonal fluctuations in rainfall.
