

How many mega-scale solar farms are there in Guyana?

Government of Guyana commissioned its second mega-scale solar farm, the 1.5 MW utility-scale solar PV plant at Bartica, Region Seven (Cuyuni-Mazaruni) in March 2023. At twenty-two (22) off-grid locations, GEA installed over 163 kWp of solar PV capacity and 800 kWh of battery energy storage.

How much solar energy is available in Guyana?

As of 2018, the total installed capacity for Solar PV in Guyana is 4.63 MW, with an estimated annual generation of 7.16 GWh. Solar energy is used for several purposes in Guyana, including drying agricultural produce, irrigation, ICT, and to improve electricity access in rural areas.

How many solar PV farms will Guyana have?

Guyana Power and Light Inc. (GPL) is preparing plans for three utility-scale solar PV farms totaling 30 MW for the national grid in the long term, as well as a 0.75 MW Solar PV Farm at Wakenaam and a 4 MW Solar PV Farm at Onverwagt in the near future.

Is Guyana a good place to install solar PV?

Most locations across Guyana have excellent solar insolation levels and are ideal for solar PV generation. As of 2018, the total installed capacity for Solar PV in Guyana is 4.63 MW, with an estimated annual generation of 7.16 GWh.

How many solar homes are distributed in Guyana?

The GEA supported the implementation of a massive electrification project to supply, deliver, and distribute 30,000 solar home energy systems to hinterland and riverine communities in Guyana. A total of 26,398 units were distributed as of December 2023.

What does the Guyana Energy Agency do?

The Guyana Energy Agency continues to support national efforts in transforming the country's sustainable low-carbon pathway and the energy sector as it contributes to providing cleaner, affordable energy access for all, as well as promoting energy efficiency and conservation practices. - END -

The rollout of the 30,000 solar PV homes initiative will begin in the coming weeks as the first batch of solar photovoltaic home systems has arrived in the country. Chief Executive Officer (CEO) of the Guyana Energy ...

Also called the Western French Guiana power plant, the project includes a 55MW photovoltaic (PV) solar park and a 128MWh hydrogen-based energy storage system, along with a battery for short-term energy storage.

See below full statement issued by the Guyana Energy Agency: Massive expansion of energy sector ongoing, solar PV installed capacity increased by 661 megawatts with thousands benefitting from renewable energy projects 26,398 solar home systems distributed 21 solar mini-grids installed Six (6) electric vehicle charging stations installed for public use; free ...

...no significant impact on environment - EPA Guyana is one step closer to getting its first ever solar-powered water treatment plant, as the Environmental Protection Agency (EPA) has waived the requirements for an impact study for the European Union (EU) funded project that will benefit over 4000 households in East Berbice-Corentyne. In a notice, the [...]

Kaieteur News - Farfan & Mendes Limited and SOVENTIX Caribbean S.R.L are expected to hand over the 1.5 megawatts Bartica solar farm to the government of Guyana on June 1, 2022. In November 2020, the Guyana Energy Agency (GEA) signed a deal for the establishment of solar farms at Lethem and Bartica which cost a total of \$1.1B.

In line with the thinking of other countries that are successfully using solar energy, the abovementioned project aims to eliminate CO2 emissions with the development of solar PV generation plants, which would lower the cost of electricity generation while supporting the country's transition towards renewable energy-based generation.

"We already assessed that we will need a second power plant and very soon, we will be launching this request for a second power plant. "So in the overall ecosystem that supports manufacturing, Guyana will be one of the most competitive locations for investments in manufacturing," President Ali said during an interview with the News Room.

Peak demand for electricity in Guyana stands at about 153 megawatts (MW) currently. In coming years, however, that demand is expected to triple. One major upcoming solar project, Dr. Sharma said, is the construction ...

NDTV and the Economic Times are among Indian media houses that yesterday reported that India's Exim Bank has signed an agreement with the Guyana government to provide an India-supported line of ...

The 1.5 MW PV Plant at Bartica was designed to accommodate increased levels of solar PV penetration as Bartica's load grows. At maximum capacity, the system will generate and supply a total of 1,988 MWh to the grid, resulting in an estimated annual reduction of 4,500 drums of diesel consumption and a 1.5 million kilogram reduction in carbon dioxide emissions.

The Guyana Power and Light (GPL) on Friday commissioned a US\$8.5 million power plant as part of the company's expansion program. ... Some 30 megawatts from solar and a further 10 megawatts generated from wind are part of the plans. Gordon said Wakenaam, Bartica and Anna Regina are three areas which will benefit from solar power. ...

The USD 2.50 million Line of Credit from Exim Bank of India to the Government of Guyana for the installation of a Solar PV Power Plant at Cheddi Jagan International Airport marks a significant milestone in India-Guyana relations. It showcases a collaborative effort towards sustainable development and renewable energy adoption.

Realising that Parika, East Bank Essequibo, was reputed for sweet pineapples and hot peppers, the Gobins decided to plant both, not realising they would have to cope with the abundance while the market also faced a glut. According to Shoba, their venture began with the purchase of 300 pineapple seedlings from a Parika farmer.

India has inked a deal with the Guyana government to provide a US\$2.5 million line of credit (LoC) for the establishment of a solar power plant at the Cheddi Jagan International Airport in Guyana. This initiative aims to harness solar energy to power the airport, contributing to sustainable and eco-friendly practices in the region.

Hydropower has the potential to provide Guyana with both utility-scale and small-scale capacity. Small-scale is discussed under "Isolated Grids" below. Guyana has a potential for 8.5 Gigawatt (GW) of hydropower on 33 hydropower plants (including storage capacity and run-of-river).

The Government of Guyana commissioned its second mega-scale solar farm, the 1.5MW utility-scale solar PV plant at Bartica, Region Seven (Cuyuni-Mazaruni) in March 2023. At 22 off-grid locations, GEA installed over ...
