

In the Nationally Determined Contributions, Guyana has committed to develop a mix of wind, solar, biomass and hydro-power to supply both demand of the national grid and the energy requirements for towns and villages in Guyana's hinterland. Guyana has set an ambitious target of achieving close to 100% renewable energy in the power sector by 2025.

Abubakar founded Solargen in 2010 while at the University of Nairobi to provide solar solutions to under-served communities. He previously worked with Equity Bank through their pre-university program. He holds BSc. Electrical Engineering from University of Nairobi and attended Key Executive Program, Harvard Business School.

Georgetown, Guyana, 8 November 2021 (IICA). - With a view to reducing its dependence on fossil fuels to generate electricity, minimizing its carbon footprint and guaranteeing access to energy, the government of ...

Solargen is selected from 47 companies for interest-free financing by Somalia Stability Fund (SSF) Installs its first solar water pumping system for irrigation in a 100-acre farm in Afgoye, Somalia Opens new branch in Hargeisa, Somaliland Solargen implements a pilot project meant to solarize 3 boreholes for rural communities in Somaliland

As Solar Gen Corp utilizes materials that not only certifies well above the Local Content Requirement (LCR), our facilities are also fully integrated and automated with the best technologies from around the world. As a company that is committed to sustainable development within the renewable energy sector, our products are approved through ...

Guyana's energy demand is growing and more solar power projects are coming on stream in coastal and hinterland areas to meet that demand, according to the Chief Executive Officer of the Guyana Energy ...

Solargen has a team of talented and multiskilled engineers who are driven by the passion to solve challenges faced by their communities. Years of experience in developing, designing, and implementing engineering solutions coupled with our understanding of host communities" needs makes us a great partner to work with.

An outline of Guyana's solar market performance. Guyana, a South American nation, is heavily dependent on imported petroleum fuels as its primary energy source. ... E. Group was established in October 2014 with the primary goal of bringing state-of-the-art solar solutions and silicon technologies to Egypt. SARL Algerian PV Company ...

Solargen in Nairobi, Kenya, delivers exceptional solar energy solutions, integrating premium energy, water & irrigation services tailored to your unique needs. +254748707766, +254794264446 Careers

2 2018; As part of the mainstreaming of low-emission energy technologies to build Guyana's green economy project, the Department of Environment and Climate Change (DECC), in collaboration with the United Nations Development Programme (UNDP), organised a three-day capacity-building programme for government officers and private sector. As part of the training ...

Guyana Power and Light has launched a tender for an EPC contractor to build three solar plants in Guyana with a combined 15 MWp capacity and 22 MWh of battery storage. Applications are due by Sept ...

While Guyana's geographic location makes offshore wind a viable alternative, current regulatory hurdles are likely to stymie investment in this technology. Solar power generation units are attractive options for companies that wish to avoid the unreliable and expensive central electricity grid.

The importance of solar farms in Guyana cannot be overstated. As a nation gifted with hundreds of thousands of square kilometres of land and an average daily insolation that far exceeds the global average, Guyana possesses a renewable energy resource waiting to be fully tapped. Solar farms harness this potential by converting sunlight into electricity [...]

In 2022, Givepower partnered with Solargen Technologies to address water quality and accessibility issues in Kitengela, Nairobi. The project involved the installation of a solar off-grid system capable of producing 75m³ of clean water per day, ensuring healthier families with access to safe drinking water.

The Government of Guyana commissioned its second mega-scale solar farm, the 1.5 MW utility-scale solar PV plant at Bartica, Region Seven (Cuyuni-Mazaruni) in March 2023. At 22 off-grid locations, GEA installed over 163 kWp of solar PV capacity and 800 kWh of battery energy storage. The installations provided electricity to public and community ...

Welcome to Solar Direct Bringing Affordable Renewable Energy Solutions to Guyana for every Guyanese Learn more Solar Systems Backup Systems Solar Water Heaters We are the last generation with a real opportunity to save the ...
