Download Brochure

A home backup battery system can provide peace of mind and ensure that you have power during an unexpected outage or emergency. However, to ensure that your backup battery system can effectively power ...

Comparatively, partial-home battery backup systems usually store around 10 to 15 kWh. Given that power outages are infrequent in most parts of the country, a partial-home battery backup system is generally all you'll need. But, if your utility isn't always reliable for power, whole-home battery backup may be the way to go.
