

Electricity in Belgium - voltage and frequency. All power sockets in Belgium provide a standard voltage of 230V with a standard frequency of 50Hz. You can use all your equipment in Belgium if the outlet voltage in your own country is between 220V-240V.

The outlet in the wall is typically only rated around 3600 continuous use (230 volts in Belgium, 16 A => 3680). A typical one-to-many splitter is rated at 3500. Don't curl up the cables! Bear in mind that the typical rating you see on the box is determined at 250V, but Belgium only has a ...

De Tesla Powerwall, ook wel Tesla Home Battery genoemd, is een accu voor bij je thuis. Het product kwam op de markt in 2015 en wordt in 2019 nog altijd verkocht in België; Producthistorie. In april 2015 stelde Tesla de Powerwall voor. De thuisbatterij was initieel verkrijgbaar als 7 kWh en als 10 kWh versie.

Edit (9/3/2021): Much of what I described in my original post was done on Home Assistant 2019.8. The 2019.9 release improved things dramatically and made my PowerWall setup way more plug and play. There's been a lot of discussion here since the 2019.9 release, so I figured I'd bring this post up-to-date TL;DR: Make sure you're on 2019.9 or newer when ...

France and Belgium have a standard socket, CEE 7/5, which is not compatible with the CEE 7/4 plug that is used in Germany and other Continental European countries. The reason for the incompatibility is that the grounding in the French/Belgian socket has a round male pin permanently mounted in the socket.
