# How to install solar panels on roof Morocco

This is because a solar panel system usually weighs about 20kg per square metre, which the great majority of roofs can hold. However, flat roofs may not always be strong enough for solar panels. Drilling into a flat roof can cause leaks, so an installer will usually ballast the panels instead - but these will add around 80kg per panel.

How much do solar panels cost to install? On average, installing solar panels costs \$2 to \$4 per watt. Most systems for homes come up to \$10,000-\$25,000 after receiving tax credits. The size of the system, quality of the panels and equipment being used, location and difficulty of installation on the roof all affect the final price.
