

Is Timor-Leste a good country for solar energy?

Timor-Leste has a high-quality solar resource. The global horizontal irradiance in Dili is higher than on the east coast of Australia, where the solar market is mature and installation costs are higher. The cost of electricity in Timor-Leste for commercial and industrial consumers is high compared to ASEAN countries.

Does Timor-Leste have a diesel power plant?

Two power plants--the 119.5 MW Hera Diesel Power Plant and the 136.6 MW Betano Diesel Power Plant--supply all of mainland Timor-Leste's electricity needs. Both plants can run on heavy fuel oil or natural gas but need some modifications. Converting the W&#228;rtil&#228;; diesel power plants to run on natural gas is possible.

Does Timor-Leste have electricity?

Stakeholders confirmed that the state delivers Timor-Leste's national electricity supply, with no private actors involved. The electricity system's power stations and transmission lines, including those being modernised through assistance from the Asian Development Bank, are shown in Fig. 4.

How is power supplied in Timor-Leste?

The district capitals and rural areas are supplied through a cumulative operational capacity of 12.1 MW. There is no transmission grid in Timor-Leste and the highest distribution voltage level is 20 kV. All power generation is based on diesel generation, using automotive diesel oil as fuel.

Does Timor-Leste have a good wind resource?

Background: Timor-Leste is believed to have areas with good wind resource, based on its geography and limited measurement both in East and West Timor. The island is on the fringes of the Pacific northeast trade winds, and some areas are up to 3,000 meters above sea level.

Is wind power economic in West Timor-Leste?

A USAID-funded wind project has been on going in the "NTT Province" of Indonesia that also includes West Timor. Based on West Timor data, this study concludes that wind power is probably not economic in coastal areas, but it may prove to be economic in the uplands and mountains of Timor-Leste both for grid connected and off-grid applications.

Timor-Leste emerged from centuries of colonization and occupation less than 20 years ago when, at the stroke of midnight on May 20, 2002, the blue United Nations (UN) flag was lowered and Timor-Leste's tricolor flag of red, black, and yellow went up after 24 years of brutal Indonesian occupation. ...
