

Will Cuba's energy investment strengthen the national energy system?

This investment is expected to significantly strengthen the national energy system. Since October, Cuba has experienced total paralysis of the national energy system three times, caused by a malfunction at the main Antonio Guiteras power plant in Matanzas in the western part of the country.

How will Cuba address the energy crisis?

The pro-government portal Cubadebate reports that Cuban authorities plan to address the energy crisis by increasing energy production from renewable sources.

Why should Cuba invest in energy?

Cuban authorities hope these investments will help ease the current crisis and ensure stable energy supplies in the future. Meanwhile, the island's residents must cope with daily difficulties due to the fuel shortage, which significantly affects their daily lives.

Why did Cuba start selling fuel in dollars?

Cuba this year began selling fuel in dollars at non-subsidized prices on par with regional neighbours. The government said this was necessary, in part, to raise enough foreign currency to ensure a steady supply at the pump.

Why does Cuba have a fuel shortage?

Officials have previously blamed fuel shortages on the decades-old U.S. trade embargo, which complicates Cuba's financial transactions, making it more difficult for the government to purchase fuel on the spot market. Cuba's long-time allies have reduced fuel shipments this year.

A.P. Moller Capital has acquired Impala Energy Holdings ("Impala") which has comprehensive experience and capabilities as well as a strong pipeline of opportunities within captive power projects. Together, Impala and A.P. Moller Capital, through the African Infrastructure Fund, will focus on supplying clean and reliable power in Nigeria.
