

How much energy does Latvia use?

Latvia is a net energy importer. Primary energy use in Latvia was 49 TWh, or 22 TWh per million persons in 2009. In 2018, electricity consumption per capita was 3731 kWh. Latvia has adopted the EU target to produce 50% of its energy from renewable sources by 2030.

Will electricity be the cornerstone of Latvia's energy transition?

Electricity will be the cornerstone of Latvia's energy transition. Latvia's hydro-dominated electricity system provides a favourable starting point to use clean electricity to decarbonise other economic sectors and meet the target of 57% renewables in total final consumption by 2030.

Will IEA continue cooperation with Latvia?

We look forward to continuing the IEA's cooperation with Latvia as it takes significant steps to advance its energy transition." The report finds that the creation of a new Ministry of Climate and Energy in January 2023 has been an important step towards meeting many of the country's energy and climate goals.

When did the IEA peer review of Latvia take place?

The IEA peer review of Latvia took place 18-25 September as part of Latvia's accession to the IEA. It came at an opportune time for Latvia, which is in the process of updating its National Energy and Climate Plan 2021-2030, in line with more ambitious European Union (EU) climate and energy transition targets.

Can Latvia achieve energy savings by renovating its building stock?

Latvia could achieve considerable energy savings by renovating its building stock. Latvia holds considerable potential to accelerate energy efficiency outcomes in the buildings sector, which will go a long way toward meeting climate targets and lowering energy bills.

How has Latvia managed to unlink its energy dependency from Russia?

Overall, Latvia has made considerable progress in unlinking its energy dependency from Russian imports in a short period of time, including by imposing bans on the import of electricity and natural gas from Russia in 2023. The government is also changing its storage model for oil reserves to further fortify its oil security.

The automatic mechanical watch recharges automatically when you wear it, thanks to the energy you create with your moving wrist. The Initium automatic watch has a power reserve of 38 hours, after which it stops when not worn. It ...
