

What is Iraq's solar energy strategy?

Iraq's solar energy strategy should be based on attracting foreign direct investments with strong commitment to diversifying its energy mix and to become energy independent bolstered by its willingness to collaborate with international array of local and foreign partners. Iraq's path forward is not, however, free of potential pitfalls.

How many solar power sites are there in Iraq?

In July 2019, Iraq's Ministry of Electricity invited independent power producers to participate in developing seven PV solar power sites with a combined capacity of 755 megawatts (MW) in the range between 30 MW to 300 MW. Many local and foreign developers saw the announcement as a move forward in an attempt to diversify the country's energy mix.

Does Iraq have a solar power plant?

The contracts also cover a water intake project for injection into oil reservoirs. The solar power plant will be Iraq's first utility-scale solar power project. While the country has several other solar plans in the pipeline, the TotalEnergies project is the first to proceed to the implementation phase.

How much solar capacity will Iraq have by 2030?

Iraq's solar plans announced in November 2021 call for the addition of 12 gigawatts of solar capacity by 2030. Some 7.5 gigawatts of the planned solar capacity are to come from utility-scale solar plants, and Iraq has reached agreements with developers - at varying stages - for projects that will add 4.5 gigawatts of the total.

Does Iraq need to invest in solar energy?

The country's approach by Gaffney, Cline & Associates in 2018 for the to attract investment in solar energy has not Government of Iraq (GoI), Iraq needs to invest been very successful previously, including the more than US \$44 billion for five years in gas-to- government offer of US\$ 3.5 per kWh feed-power value chain.

How much solar power does Iraq have in 2023?

According to the latest statistics by the International Renewable Energy Agency, it had just 1,599 megawatts of renewable energy capacity at the end of 2023. Iraq has abundant untapped solar resources that could allow it to achieve its target and reduce reliance on imports of electricity.

"I knew that using solar energy had positive returns on the environment, and in a country like my homeland, Iraq, there is an urgent need to use it," explains Ihsan, 49-year-old father-of-four and recipient of a rooftop solar PV system in Najaf.

My areas of specialization include training in various aspects of solar engineering, such as site assessment, sizing, design, and PV solar system installation. Additionally, I can provide guidance on the responsibilities of a Sales Engineer within the solar energy sector, in Iraq and KRI. Contact: prushamuhamad(at)gmail or
