

Is the Isle of Man a gas-fired power station?

This power station is the only gas-fired power station operating on the Isle of Man. With an expected retirement year of 2035, the government of the Isle of Man is working to phase out all fossil fuel fired power generation by 2040.

Does the Isle of Man need a new interconnector?

Balancing the Isle of Man's electricity network requires stabilising power; this cannot be provided from sources which are reliant on the weather to produce electricity as these sources cannot be guaranteed at all times. In all scenarios the most cost-effective solution of providing this stabilising power is a new interconnector to the UK.

Could the Isle of Man re-import electricity from an offshore wind farm?

With interconnectors the Isle of Man could re-import electricity generated from an offshore wind farm, allowing GB to manage the balancing. This would likely result in much lower costs to consumers. CFDs are not currently open to the Isle of Man as it is not part of the UK.

Will the Isle of Man be short of baseload power?

Both UK and RoI are predicted to become short of baseload power over the next decade. Opportunities for the Isle of Man to provide stabilising power to GB or ROI from a large-scale baseload power station, e.g. biomass or a small modular reactor? Neither option is without challenge, but likely provide the greatest potential for export.

Can wind power be exported from the Isle of man to GB?

Given the high proportion of wind being installed in both UK and Irish waters over the next ten - thirty years (see Fig. 9 and Fig. 10) there may be limited opportunity to export power generated from offshore wind from the Isle of Man to GB, if it has to be brought onto the island first.

What would a biomass generator do for the Isle of Man?

The biomass generators would allow the Isle of Man to maintain supply to key sectors (e.g. buildings providing public services, data-centres) as well as an increased domestic area relative to Scenario 2 in the event of a GB black-out, with other sectors quickly reconnected following restoration of supply.

The Isle of Man Container Line Group has an exclusive agreement with Gulf Express Line for shipments to and from the United States of America where ocean services are regulated with the Federal Maritime Commission.
