

Can the Isle of Man provide stabilising power to GB or ROI?

Opportunities for the Isle of Man to provide stabilising power to GB or ROI from a large-scale baseload power station, e.g. biomass or a small modular reactor? Neither option is without challenge, but likely provide the greatest potential for export. These options have not been explored in the analysis.

Will the Isle of Man be short of baseload power?

Both UK and ROI are predicted to become short of baseload power over the next decade. Opportunities for the Isle of Man to provide stabilising power to GB or ROI from a large-scale baseload power station, e.g. biomass or a small modular reactor? Neither option is without challenge, but likely provide the greatest potential for export.

Can we build more than the Isle of Man's first offshore wind farm?

Together we can build more than the Isle of Man's first offshore wind farm- we can lay the foundation for lasting economic investment, develop skills, create jobs, and protect and enhance the marine environment.

Repairs to the central heating system (including radiators and hot water cylinders), cooking appliances, plumbing, drains and gas fires. Costs of replacement parts -these will be charged for separately and might require additional labour to fit them
