A project to install solar lights in some 30 rural St Andrew communities sounds like a common-sense plan which could put Jamaica along the path to achieving a more sustainable energy future. Admittedly, these may be mere baby steps in the scheme of...

Off grid photovoltaic systems are completely independent of the grid. The energy produced by the solar panels are collected and stored in special batteries that are rechargeable. A device called a charge controller regulates the raw DC power to prevent overcharging and protect the batteries. Batteries store energy in the form of Direct Current, therefore another device called an inverter ...
