Sustainable hydroponics solution is intended to address some of the recurring challenges of climate change in Jamaica, including sporadic and heavy rains, as well as extended dry season. The main features of the innovation include a recirculating system, which enables the controlled distribution of nutrient solution via a solar-powered pump.

National Water Commission, NWC, plans to set up a solar system in St James, with a capacity of around 1 megawatt, to cut down on its energy bill. The water utility received planning approval from the National Environment and Planning Agency, NEPA, in November to install a solar photovoltaic system at Leaders Avenue in Montego Bay.
