

Does Jordan have a solar energy policy?

Jordan has implemented several policies to encourage the growth of solar energy in the country. In 2012, the government introduced a feed-in tariff system that offers a fixed rate for solar energy producers to sell their electricity to the grid.

How does Jordan support the development of solar energy?

In addition, Jordan has signed several agreements with international organizations and foreign governments to support the development of its solar energy sector. For example, in 2018, Jordan signed an agreement with the International Finance Corporation (IFC) to support the development of a 200 MW solar project in the country.

What is the outlook for solar energy in Jordan?

Looking ahead, the outlook for solar energy in Jordan is positive. According to a report by the International Renewable Energy Agency (IRENA), Jordan is expected to increase its solar energy capacity to 2.7 GW by 2023, up from 1.7 GW in 2020.

What percentage of Jordan's electricity is generated by solar energy?

Currently, solar energy accounts for around 5% of Jordan's electricity generation capacity. This is relatively low compared to other countries in the region, such as the United Arab Emirates and Saudi Arabia, which have made significant investments in solar energy.

What solar projects are being built in Jordan?

Jordan has several large-scale solar projects under construction or in the planning stages, including the 800 MW Al-Dhafra project, which is being developed by the Abu Dhabi National Energy Company (TAQA) and the 400 MW Al-Risha project, which is being developed by Saudi Arabia's ACWA Power.

Could rooftop solar power be the future of energy in Jordan?

According to the IRENA report, rooftop solar installations could account for up to 1.4 GW of solar energy capacity in Jordan by 2030. This presents an opportunity for households and businesses in the country to generate their own electricity and reduce their reliance on the grid.

MASE, Modern Arabia for Solar Energy, was established by the Arabia Group of Companies, to lead clean energy development in Jordan and the MENA+GCC region. Specializing in turnkey integration, implementation and operation of renewable technology systems, MASE is a leading Jordanian solar developer, installer and O&M provider.

The power generated by an On-Grid Solar PV System is guaranteed to be cheaper than the power imported from the Utility Grid; The "buy back period" for a Solar PV System is generally less than 5 years, meaning you can recover your investment in less than 5 years
