

How much do solar panels cost in Indonesia?

Across the world, the cost of solar panels is declining, and Indonesia is no different. The price of solar modules dropped from USD 4.12 per watt in 2008 to USD 0.17 per watt in 2020. This translates to lower costs for solar energy, which are around USD 0.04 per kWh.

What are the best solar panels for landed homes in Indonesia?

The most popular solar panel brands in Indonesia are typically the more affordable top Chinese manufactured panels in the list such as LONGi, Jinko, Trina, JA Solar, etc. Here's a rough estimate of the standard system cost for landed homes in Indonesia. Remember that installation costs will also vary depending on the above factors.

What is the local content of solar energy projects in Indonesia?

According to MEMR Decree No 5/2017, the local content for energy projects in Indonesia was a minimum of 40% in 2017 and will be gradually increased up to 60% in 2019. Due to the relatively small scale of solar manufacturing in Indonesia, it is unlikely that local production can be competitive against international prices.

Why is solar energy important in Indonesia?

The economic aspect of solar energy, particularly the cost of solar panels, plays a critical role in its adoption. This price reduction is crucial for the decarbonisation of Indonesia's energy sector and signifies solar power's role in the global climate transition.

How much solar power does Indonesia have?

As of May 2024, Indonesia's installed rooftop solar capacity was only 0.192 MWp, according to research firm Rystad Energy. Are the goals achievable? Indonesia previously set renewable energy targets, hoping that by 2025, the country's share of renewable power generation in the energy mix will reach 23%.

How much does a solar system cost?

Overall, the price of installing grid-tied solar systems can range from 40 million IDR for small houses, 90 mil. IDR for medium sized townhouses to 150 mil. IDR or more for larger bungalows. Most solar panels come with a 12-year product warranty and 25-year power output warranty. Meanwhile, solar inverters usually have a 5-year product warranty.
