

What is the Kiribati energy roadmap?

The KIER is Kiribati's comprehensive energy roadmap, which takes into account renewable energy and energy efficiency potential in all sectors from 2017 to 2025.

Does Kiribati need electricity?

As a small, remote island state, Kiribati is highly dependent on imported energy supply. Electricity is one of the government's largest expenditures. Yet the current fossil fuel-based power system is inadequate to meet future demand.

Should solar PV be deployed in Kiribati?

The findings of this roadmap show that power sector is a key area, where the ongoing efforts from the deployment of solar PV should be continued and complemented with an improvement of efficiency in Kiribati's entire energy system, including electricity use, heating, cooling, and transport.

Who generates electricity in Kiribati?

Sector context. Grid-connected electricity in Kiribati's capital, South Tarawa, is generated and distributed by the Public Utilities Board (PUB), a state-owned electricity and water utility.

Why are there no independent power providers in Kiribati?

Also, despite the potential for revenue generation from the high electricity costs, there are currently no independent power providers in Kiribati. Barriers to private sector investment include (i) lack of an enabling policy and regulatory framework, (ii) credit worthiness of PUB as an off-taker, and (iii) small transaction sizes.⁸

Why is electricity so expensive in Kiribati?

Of the 7,877 households in South Tarawa (44% of total households in Kiribati), 72.4% are connected to grid electricity. Access is largely for lighting, and that lighting is often insufficient, inefficient, and expensive. The high electricity cost has suppressed demand and has hindered growth in the commercial and tourism sectors.

Telesystem Energy | 208 ? LinkedIn ???? The Only Option For Affordable & Renewable Baseload Power | Telesystem Energy ("TE") through its team of world-renowned R&D specialists, has developed the only available option for affordable and renewable baseload power that is cost competitive against any source of electrical power generation (thermal or renewable).
