

Who is Florian from kraftfeld & what does he do?

Florian focuses project development and legal matters. As a co-founder he has been with Kraftfeld since 2009. He started his career advising international energy companies on their expansion in CEE. He built up his expertise in renewable energy while working at an energy investment firm.

How does kraftfeld manage its solar assets?

Today Kraftfeld manages its solar assets and works to expand its portfolio. Kraftfeld started a pipeline of large solar farms in Hungary, Romania and Austria in 2019. The company now has several hundred megawatts under development in these core markets. Kraftfeld has offices in Vienna, Budapest, and Bucharest.

Does French Polynesia rely on hydrocarbons?

French Polynesia, like most island territories, is highly dependent on hydrocarbon imports. In 2019, 93.8% of energy consumed in the archipelagos came from imports of various petroleum-based fuels. The renewable energy penetration rate in power generation stood at 28.78% in 2019. This figure has remained stable over the last five years.

How is electricity produced in French Polynesia?

Electricity production in French Polynesia is still heavily dependent on fossil fuels despite the development of renewable energy sources (REn). Electricity production and consumption are unevenly distributed over the territory as they are correlated with the geographical distribution of the population.

Where is kraftfeld based?

Kraftfeld has offices in Vienna, Budapest, and Bucharest. An in-house trading team sells the power produced by its assets via PPAs and on the spot market. Rolf is a co-founder of Kraftfeld and in charge of deal structuring and financing. He is an experienced investment professional who has worked with international banks.

Where are kraftfeld solar farms located?

Kraftfeld started a pipeline of large solar farms in Hungary, Romania and Austria in 2019. The company now has several hundred megawatts under development in these core markets. Kraftfeld has offices in Vienna, Budapest, and Bucharest. An in-house trading team sells the power produced by its assets via PPAs and on the spot market.

AFD and the Polynesian authorities have jointly defined a support program to assist French Polynesia with its energy transition. By 2030, the renewable energy penetration rate in power generation will reach about 75%.

French Polynesia, like most island territories, is highly dependent on hydrocarbon imports. In 2019, 93.8% of energy consumed in the archipelagos came from imports of various petroleum-based fuels. The renewable

energy penetration rate in power generation stood at 28.78% in 2019. This figure has remained stable over the last five years.
