

Will Kuwait increase the share of renewables in energy demand?

Kuwait has a soft target of increasing the share of renewables in total energy demand to about 15% by 2030, up from less than 1% today. The potential for increasing the share of renewables in the electricity generation mix in Kuwait is huge, given its substantial solar and wind resources. Central Statistics Office,

Is Kuwait facing a changing energy world?

Kuwait, like all oil-producing countries, is facing a changing energy world today. Shifting supply, demand and technology trends have ushered in an energy world where oil-price volatility and market uncertainty are the defining features.

What is energy in Kuwait?

Energy in Kuwait refers to energy and electricity production, consumption, import, and export in Kuwait. Kuwait was the 9th top oil producer in 2009 and is a member of OPEC. The population of Kuwait grew by 11% from 2004 to 2008, and energy export grew by 16% during the same period.

Who was the project coordinator for the Kuwait Energy Outlook?

Mohamed Nassar was the project coordinator from the UNDP. Special thanks go to Khaled Mahdi, Secretary-General of the General Secretariat of the Supreme Council for Planning and Development, for his commissioning and sponsorship of this work. The editorial committee of the Kuwait Energy Outlook provided valuable insights and feedback.

How much energy does Kuwait use in 2021?

Kuwait's economy consumed an estimated 1.6 quadrillion British thermal units (quads) of primary energy in 2021, up from 1.5 quads in 2020, after the country began to recover from the effects of the COVID-19 pandemic (Table 1).

What is Kuwait Energy Outlook?

The platform came in the form of Kuwait Energy Outlook, an energy policy platform supporting efficient coordination between the energy sector stakeholders that assures coordination and robust development among them to realize the country's domestic and international responsibilities operated and managed by national capacities.
