

Central Battery System for Emergency Lighting is the backup power source for the Emergency - Exit Lights provided centrally. This way, each Emergency and Exit Light does not need to have a battery or super capacitor of their own.

In such a system, the emergency luminaires of the central battery system do not have their own emergency power supply (e.g. a battery or supercapacitor). Teknoware's range of central battery systems starts with small systems containing just a few dozen luminaires and a single central battery unit up to centrally controlled systems containing ...

Our lithium-ion battery system offers high power density in the smallest footprint to provide immediate and continuous support during power-off events to ensure a facility's continuous operations. The system is perfect for applications demanding ...

Teknoware offers a 230V AC/DC-based Central Battery System (CBS) consisting of control panels, aesthetically appealing emergency and exit luminaires, sub-circuit monitoring modules, address modules to connect third-party luminaires ...
