The integration of solar energy with storage solutions is essential for balancing supply and demand. Solar power generation can be intermittent, but with an advanced solar storage system, excess energy produced during peak sunlight hours is stored and used when the demand is high or when solar production decreases.

"Sungrow"s ESS solutions supplied in this microgrid provide a 24-hour [electricity] supply for these projects and make them independent from pollutive diesel generation," according to Alvin Shi, managing director of Sungrow MENA region.
