

NINGBO, China, March 21, 2024 /PRNewswire/ -- Since its official launch in July 2023, Risen Energy's 700Wp+ heterojunction (HJT) Hyper-ion modules have been demonstrating strength in overseas markets. With continuous improvements in module power and efficiency, as well as outstanding performance in high power generation and low carbon footprint, they are highly ...

Libya is a fully electrified country. Most of the population has access to the grid, but a few remote areas rely mostly on diesel generation. The grid serves about 1.2 million customers, mostly concentrated in Tripoli, middle, and west regions. The grid also serves the industrial sector, public services (health and education facilities), and ...

What's the Secret behind the Global Popularity of Risen Energy's HJT Hyper-ion Modules? March 21, 2024. Facebook WhatsApp Twitter Pinterest LinkedIn Telegram Tumblr Email Reddit VKontakte.

Risen Energy said the manufacturing section of the complex is planned to take four years for completion. Recently, third-party testing and certification organisation TÜV Rheinland confirmed that Risen Energy's heterojunction module series have achieved a maximum power of 721.016W and 23.65% module efficiency.
