

Is solar energy booming in Luxembourg?

Energy Minister Claude Turmes stated: "Solar energy is booming in Luxembourg: today we already occupy fourth place at European level in terms of photovoltaic power per inhabitant.

How many solar panels will Luxembourg-Hollerich produce a year?

In a first phase, nearly 100,000 panels (ie 50MW in real capacity) will be produced each year in Luxembourg-Hollerich on the former site of the tobacco company Heintz Van Landewyck, thus creating more than 20 direct jobs. The production line will be installed at the end of 2023. There are also plans to double the production capacity by 2026.

How many solar modules are there in Luxembourg?

The European joint venture will open a PV module factory in Hollerich, Luxembourg, at the end of this year. In the first phase, the facility will have 50 MW of capacity, producing nearly 100,000 solar modules per year, according to a statement from the government of Luxembourg. Solarcells plans to double the factory's capacity to 100 MW by 2026.

Is Luxembourg a good place to invest in solar energy?

Overall, Luxembourg actively promotes photovoltaic installations and has seen significant growth in the sector in recent years. Government support and various incentives are expected to continue to fuel the development of solar energy in the country.

Solar energy has been gaining ground in European decarbonization plans. According to SolarPower Europe, this region has installed more than 40 GWp of capacity, 50% more than in 2021. This growth has been driven by rising energy prices, growing geopolitical prices and increasing geopolitical tensions, which have brought Europe a new sense of ...

Solar power directly contributes to the Luxembourg's energy security and independence, as well as helping to meet rising electricity demand and CO2 emission reduction goals. Despite the COVID-19 impasse, around 141 GW of new solar PV capacity was added worldwide in 2020, about a 14% increase from 2019.
