

What is Luxembourg's Energy Policy?

As part of an energy policy geared towards a sustainable, secure and competitive energy supply, this financial aid is aimed at improving the energy performance of single-family houses or apartments. Luxembourg wants to accelerate the timelines for renewable energies in order to reach around 25% clean energy by 2030 and 100% in the long term.

Does Luxembourg need photovoltaics?

Luxembourg has an ambitious target to increase the share of energy from renewable sources to 25% by 2030. The development of photovoltaics is one of the solutions recommended in Luxembourg's integrated national energy and climate plan (PNEC, Predicted No-Effect Concentration).

How has teleworking impacted solar energy demand in Luxembourg?

The high number of sunshine hours in spring coupled with an increase in the photovoltaic surface area over recent years have been key factors in reaching a historical peak of solar energy in Luxembourg in March and April 2020. In addition, teleworking during the weeks of lockdown had a positive influence on electricity demand, which declined.

Will Luxembourg transition to climate neutrality?

The transition to climate neutrality seems to be making great strides. With 306.3 hours of sunshine in April, which is well above average, the exceptional weather was one of the reasons behind the historical peak of solar energy in Luxembourg.

What products does Zoneygy offer?

As a leading solar energy equipment supplier, Zoneygy offers an extensive product portfolio featuring four major categories: residential products, commercial products, large-scale power station products, and photovoltaic module products.

Can a bank grant a climate bond in Luxembourg?

Please note that some banks in Luxembourg grant climate bonds to encourage the energy renovation of residential buildings older than 10 years. This can be used to pre-finance work at low or zero interest rates.
