

Is Hungary a trading hub for Russian gas?

“Hungary has become a trading hub for Russian gas... While Europe is moving away from Russian energy sources, Hungary is moving in the opposite direction,” he said. While Hungary's storage facilities are already full and its energy security does not justify additional purchases, the country continues to increase its gas imports.

Why is Hungary a gas hub?

Hungary has become a gas hub in the region, which gives Budapest special leverage and importance over its neighbors. “Our gas demand is about 8.3 billion cubic meters per year, but last year 17 billion cubic meters of gas passed through the country, which proves our growing transit role.

How much gas did Hungary buy from Gazprom in 2021?

Under a long-term gas contract signed in 2021, Hungary was already buying 4.5 billion cubic meters of gas per year from Gazprom; now this figure is set to rise to 6.7 billion cubic meters per year, a trend that contradicts EU policy to reduce purchases of Russian gas.

How many people in Hungary use district heating?

In Hungary, about 650 thousand apartments in 95 towns are supplied by district heat. Approximately 80% of the thermal energy sold by district heating suppliers is consumed by households for heating and hot water consumption. District heating services are local public utility services.

How much natural gas does Hungary use?

Hungary consumes 10 billion cubic meters of natural gas annually. Nearly 85% of this comes from Russia. After receiving a \$110 million subsidy from the EU, the Krk LNG Terminal (or FSRU) began operating in Hungary in January 2021.

Does Hungary still import gas from Russia?

While Hungary's storage facilities are already full and its energy security does not justify additional purchases, the country continues to increase its gas imports. Its annual gas imports from Russia are expected to increase by more than 2 billion cubic meters (m<sup>3</sup>/year).

US distributed generation developer Madison Energy Infrastructure on Monday said it has closed a USD-450-million (EUR 421m) construction-to-term debt facility to fund its next phase of growth.
