The cost of solar panels in Malta varies depending on the type of solar panel and its size. Generally, a typical single phase 4.04kWp PV system would cost around EUR3,220 after government grant, with the average prices for solar panels systems ranging from about EUR800 to over EUR1,000 per kW of installed capacity, depending on exact specifications.

So by default, any electricity your solar panels generate will be used to power your home, and then used to charge your storage battery. Any unused electricity is exported back to the grid when your battery is full, or when you schedule it to (which you may want to do, as some energy companies will pay you more for exporting electricity at peak ...
