So, reducing energy consumption can inevitably help to reduce emissions. However, some energy consumption is essential to human wellbeing and rising living standards. Energy intensity can therefore be a useful metric to monitor. ...

Image: Afrik21. Energy is a priority for poverty reduction in Mauritania, according to its Accelerated Growth and Shared Prosperity Strategy. As a result, Mauritania's government is attempting to boost the economy by expanding its electricity supply and encouraging investment in renewable energy.

energy system. The country has put in place a favourable regulatory framework, oering incentives and

concessions to investors interested in developing wind energy projects. Mauritania has has looked for to expand international coop - eration in wind energy eld, working with regional and Fig. 1 Global onshore cumula-tive wind power installed

Mauritania boasts a strategic geographic location, spanning over one million square kilometers with a 754-kilometer coastline. Despite its predominantly arid desert landscape, Mauritania possesses a wealth of renewable energy resources (solar, wind and wave), as well as natural gas fields in its offshore territory.

These data were also used to calibrate a simple energy system model using the Open Source Energy Modelling System (OSeMOSYS) and two stylized scenarios (Fossil Future and Least Cost) for 2020-2050.

Air-Conditioning Ventilations & Air Filtration Systems Installation & Maintenance Includes series of installation processes ranging from fitting devices and accessories to air-conditions, ventilators, air-purifiers, to reconditioning and maintaining the old units, cleaning air ducts, fixing fans, fabric filters, sound dampers... etc.
