Panel enclosures are exactly what they sound like -- structures built to protect equipment from surroundings that have been deemed problematic in some way. What's more, they keep people safe. Given the vast array of environments that can exist in workspaces (e.g., warehouses, factories, office buildings), the type of panel enclosure that may be needed will be different ...

Eaton's B-Line series Type 1 panel enclosures are designed to house electrical controls and instruments in an environment which does not require oil or dust tight specifications. They help protect against contact with enclosed equipment.

Ensuring your control panels are adequately cooled can be difficult, especially in small spaces. See the different solutions available to you. Search. 972.580.0200 or 888.580.0202. ... An enclosure air conditioner with a small footprint might not allow enough cutout surface area to sufficiently cool the panel. With options to adjust or expand ...

A methodical approach to industrial control panel enclosure cooling ensures that the internal temperature of an enclosure is predictable and that heat related incidents are avoided. As a first step, it is absolutely essential to evaluate the maximum temperature that can be tolerated inside the enclosure. The temperature chosen should be ...
