

Is Mexico a good market for solar PV?

Moreover, Mexico has emerged as one of the top markets for solar PV in recent years, owing to its aggressive deployment of solar PV plants that were awarded in the first three long-term auctions (LTAs) during 2015-2018. The country touched the GW mark in 2018 for the first time, with 2.7 GW newly installed capacity in the same year.

Will Mexico's undeveloped power system stifle the solar PV market?

Lack of new initiatives, restricted land, and factors such as the current government's withdrawal of the fourth auction round, Mexico's undeveloped power system is likely to stifle the solar PV market's growth in the future years. The Covid-19 pandemic affected the demand and supply of Mexico solar energy market.

What is the solar market segment in Mexico?

The report covers Solar Companies in Mexico and the market is segmented by Deployment (Residential, Commercial, and Utility-scale) and Technology (Photovoltaic and CSP). Click on data point to dive deeper into the details and uncover valuable insights about each segment. We've received your request. Our team will be reaching out to you shortly.

Why is Mexico launching a solar financing wave?

In Mexico, the solar financing wave is being fueled in large part by the country's renewable energy goals, which are 35% by 2024 and 50% by 2050. The higher investment and government policies are expected to provide good opportunity to the Mexican solar energy market during the forecast period.

Why are solar panels becoming more popular in Mexico?

The demand for solar cells has grown significantly with an increase in rooftop installations, followed by growth in architectural applications. Mexico offers some of the world's most appealing sun irradiation characteristics.
