

Where can I find information about Guadeloupe energy?

Welcome to the website of Guadeloupe Energie! On this website, you'll find information on Guadeloupe's progress on energy transition from energy legislation to industry data, from profiles for renewable energy in Guadeloupe to the latest news and events--all in one place.

How can Guadeloupe achieve energy independence?

"Achieving energy independence in Guadeloupe by shifting from fossil fuels to renewable energy sources is a challenge that we must take up for the benefit of future generations. With clear objectives and applying the means for success, the Multi-Year Energy Program (PPE) exemplifies our political resolve to reach our goals."

Why is geothermal energy important in Guadeloupe?

Geothermal energy is especially attractive since Guadeloupe is an archipelago. Production can be fully controlled, unlike photovoltaics, for example, which depends on sunlight conditions. Production costs are about half those of fossil fuel power plants and are not vulnerable to fluctuations in the world market.

When did geothermal power start in Guadeloupe?

Geothermal-powered electricity production began in 1996, with total production increasing to 15 MW once Bouillante 2 was brought on line in 2003. Electricity generated here accounts for 5% total generation in Guadeloupe.

Solusi energi surya yang cerdas dan berkelanjutan untuk kebutuhan rumah atau bisnis Anda. Solar Panel SL 3000 OGD merupakan komponen utama dalam menghasilkan Listrik DC yang diproduksi langsung dari sinar matahari dan dikoversi menjadi energi listrik AC menggunakan Inverter dan dialirkan secara langsung dari Inverter ke Jaringan Instalasi PLN ...

Smart and sustainable solar energy solutions for your home or business needs. Solar Panel SL 4000 OGD is the main component in generating DC electricity which is produced directly from sunlight and converted into AC electrical energy using an Inverter and flowed directly from the Inverter directly to the PLN Installation Network. SL 4000 OGD that we offer you are the best ...

Smart and sustainable solar energy solutions for your home or business needs. Solar Panel SL5000HBR is the main component in generating DC electricity which is produced directly from the sunlight is then stored in the battery and partly converted into AC electrical energy using an inverter and flowed directly from the inverter to the PLN installation network directly. The ...

"I can confidently recommend Modena's services to any company. Their energy, knowledge, innovativeness, and service mindset has made our day-to-day business so much easier" ET-Global "Modena has become our only port of call for all licensing, training and software support requirements. It has been a pleasant experience based on personalised ...

Jiangsu, PRC - The joint venture between two forces in the consumer electronics industry aims to usher in a new era of home technology. On April 22nd, 2023, MODENA, global electronics and technology company, signed a Memorandum of Understanding (MoU) with Chinese manufacturer, Sonlu-Shangling, at their upcoming shared facility, marking ...

MODENA engineers its modern units, like the Multidoor Refrigerator RF 4311 MADS and Side By Side Refrigerator RF 4671 SADS, to maximize energy efficiency while minimizing environmental impact. As worldwide energy usage rises alongside growing climate concerns, upgrading to modern refrigeration technology offers a practical solution.

Dengan komitmen menyediakan solusi revolusioner dalam sektor energy provider, MODENA Energy menjadi mitra bagi program-program pemerintah dalam mendorong penggunaan energi terbarukan, serta membangun masa depan yang lebih berkelanjutan bagi Indonesia.. Gian N Pratama selaku MODENA Energy Vice President menjelaskan MODENA ...

In the 1960s, in the Emilia Romagna region of Italy, where MODENA was established with the mission to make life easier for all. Today, this same dream continues to drive us at our core, empowering us to consistently be on the cutting-edge of innovation to answer the needs of customers past, present, and future. ... Energy, and beyond. We don ...
