

How can Moldova's energy system be integrated with Europe?

Improve physical and market integration of Moldova's energy system with Europe. Connecting Moldova's electricity system to the European grid is an important first step that will help create an open electricity market with neighboring countries and support fair and competitive procurement of cleaner energy.

Does Moldova need alternative energy suppliers?

Increasing energy costs and Moldova's initiatives to diversify its gas and electricity sources present an opportunity for alternative energy suppliers. The government intends to increase the proportion of renewable energy in the energy mix through funding significant renewable energy projects through competitive procurement.

Does Moldova have a new energy policy?

Moldova has committed to implement reforms embedded within the European Union's Third Energy Package, a suite of legislation adopted in 2009 aimed at creating integrated and competitive energy markets for natural gas and electricity.

Does Moldova use natural gas?

Moldavskaya GRES (MGRES) provides the majority of the remaining 80 percent of energy in the separatist area of Transnistria. Ukraine is also a supplier of electricity to Moldova. Moldova's natural gas use is virtually entirely dependent on imports from Russia. MGRES transforms Russian natural gas into electricity for sale on the right bank.
