This target was not met. However, the Energy Community has also started to consider the implementation of a revised Renewable Energy Directive (RED II) on the promotion of energy from renewable sources. If fully transposed into Moldovan law, this would set a target of 9% of renewable sources in the transport sector in Moldova by 2030.

Chișinău, the capital of the Republic of Moldova, is advancing efforts to boost renewable energy production, aiming for energy independence and a transition to green energy. Moldova's energy landscape shifted significantly following the ...

4 ???#0183; How much renewable energy do we have and where do we want to go? Due to consumption structure limitations, renewable energy generation capacities are capped in Moldova. Thus, 105 MW have been allocated for wind energy and 60 MW for photovoltaic, to be commissioned by 2025. In 2023, only 6% of electricity consumption is renewable energy.

renewable energy source in Moldova. Compared to other European countries, Moldova has a relatively high

amount of sunshine hours per year and therefore significant potential for the use of solar energy. Technology Technical Potential 2030 [GW] Wind 20.9 Solar PV 4.6 Biomass 0.9 ...
