

Does Mongolia have a 10 MW solar farm?

Mongolia has connected a 10 MW solar farm to the grid, as part of a plan to deploy 40.5 MW of solar and wind capacity in the nation's western regions. The Asian Development Bank (ADB) and the government of Mongolia have inaugurated a 10 MW solar power plant in Mongolia's Govi-Altai province.

What is Mongolia's solar project?

The PV project is part of a program aimed at deploying 40.5 MW of solar and wind capacity in the country's western and Altai-Uliastai regions. Mongolia had an installed PV capacity of around 100 MW at the end of August.

How much solar power does Mongolia have?

Overall, Mongolia had an installed PV capacity of around 100 MW at the end of August, Myagmardorj Enhkmond, the Secretary General of the Mongolian Renewables Industries Association, told pv magazine. However, most of this capacity - around 90 MW - was installed between 2016 and 2018, as a result of auctions held in previous years.

How to contact GSE Mongolia?

Mongolia covers about 90% of its heating energy with domestic coal. Besides the immense environmental and climate impacts, air pollution, which is primarily caused by burning coal, is responsible for about 3300 premature deaths each year in Ulaanbaatar alone. Switching to solar electric heating can provide a sustainable solution.

Mongolia is estimated by the National Renewable Energy Laboratory to have good-to-excellent wind resources of over 2,550 terawatt-hours per year. When including moderate-level wind resources, or those suitable for rural power applications, this estimate increases to over 8,123 terawatt-hours per year. [Main menu.](#)
