

# Mongolia portable solar panels for renters

How many solar homes are there in Mongolia?

Over 67,000 solar home systems were sold between 2006 and 2012, reaching herders in every aimag (province) in the country. As a result, more than half a million people covering between 60-70 percent of Mongolia's nomadic herders now have access to electricity.

Can solar panels help Mongolian herders and nomads?

Dotted across the steppes, glints of light can be seen as the sun bounces off the solar panels that have been installed on the sides of gers made of felt and yak's wool. At the start of this millennium, Mongolia's herders and nomads had little or no access to modern electric power and its potential benefits.

When did Mongolia start a solar GER electrification program?

In 2000, the Government of Mongolia began the National 100,000 Solar Ger (Yurt) Electrification Program. The program provided photovoltaic solar home systems that were portable in design, making the systems adaptable to the nomadic lifestyle of herders and complementing their traditional way of life.

Who benefits from portable solar home systems?

Bor, a herder who mainly travels around western Mongolia's Arkhangai province, is one of the people whose family benefits from portable solar home systems (SHS). "We use it for generating the power for lighting in the ger, charging phones, we can also generate a fridge to keep food longer and we can run a television.

How many sales and service centers are there in Mongolia?

Fifty Sales and Service Centers were established, with at least one in each of Mongolia's 21 aimags (provinces). These Sales and Service Centers also bundle other consumer electronics and appliances that herders now want to purchase.

How can a herder electrification project help Mongolia?

Mongolia is currently experiencing an economic boom from the exploitation of its mineral wealth, and efforts such as herder electrification can help ensure that this important community, which connects the country to its rich history, can maintain their way of life without being left behind.

Portable solar panels might be a good option if you want to take smaller steps to harness solar energy. You can invest in a small, standalone panel to generate enough energy to power individual devices or small areas within your rental. Portable solar panel systems are easy to set up and generally do not require landlord approval.

Fewer options: Tenants can't make the decision to install a solar system on their own, and community solar programs may not be in place, so portable solar panels are the only option. No more financial incentives:

Because tenants don't own their homes, when you install a solar system on your roof, you don't get a direct subsidy like a ...
