

Why should Montserrat invest in re-sat projects?

The RE-SAT projects has provided the Government of Montserrat with a new renewable energy platform that has been used to support their transition to renewables and a climate resilient future. Montserrat has a vision of achieving 100% renewable energy grid penetration by 2030.

Can wind energy be implemented in Montserrat?

Although wind energy has not yet been fully re-explored in Montserrat, a desktop study using RE-SAT wind resource maps was conducted to determine suitable locations for the implementation of wind energy. The outcome of this study was included in their first Environmental Statistics Compendium in Montserrat, which was published in 2020.

Who provided the power data for the solar PV project in Montserrat?

The power data was kindly provided by the Government of Montserrat. Figure 16: Placard for the 250kW solar PV project in Montserrat. Renewable Energy planning in Montserrat

Who created the Energy Task Force in Montserrat?

An Energy Task Force was created in Montserrat, which included the Energy Unit of MCWEL, the Program Management Office in Montserrat, MUL and a Blue Economy consultant, that was charged with the creation of an alternative IRP.

Who is our partner in Montserrat?

Our lead partner in Montserrat is the Energy unit within the Ministry of Communications, Works, Energy and Labour (MCWEL).

Does Montserrat need a geothermal plant?

To go beyond this, Montserrat is developing plans to ensure the electricity system can operate reliably. The target of 100% was based on information provided from the 2010 geothermal study<sup>4</sup>, and an Early Market Engagement exercise in 2017 to procure a 2.5-5MW geothermal plant which would satisfy 100% of the Montserrat energy requirement.

SAE is pleased to announce that the Company's CEO Graham Reid, CFO Simon Hirst, COO David Taaffe and Director of External Affairs Sean Parsons will provide a live presentation and Q& A session via Investor Meet Company on 23 Oct 2024, 10:00 BST. ...
