

What is the Moroccan Agency for Solar Energy (MASEN)?

The Moroccan Agency for Solar Energy (MASEN) was set up specifically to execute these projects. Its mission is to implement all projects related to the National Energy Strategy and to co-ordinate and supervise all other activities connected with this initiative.

How to save energy and control energy consumption in Morocco?

In this context, a number of measures to save energy and control energy consumption in various sectors (industry, buildings, agriculture, public lighting and transport) have been adopted in Morocco. To support energy efficiency programmes, Law 47-09 on energy efficiency was published in 2011 .

What is Morocco's New Energy Strategy?

Hydropower program In Morocco's new energy strategy, 14% of the country's energy production will come from hydropower by 2020. Installed hydropower capacity will be increased from 1,730 MW in 2008 to 2,000 MW in 2020 through the construction of new hydropower dams and Pumped Energy Transfer Station (PETS).

How much energy does Morocco use?

Between 2013 and 2019, Morocco's combined hydro, wind and solar power generation increased from 4,346 GWh to 7,932 GWh, making up 19% of total electricity generation in 2019 (and 3.5% of total 2018 energy use).

Why is Morocco a leading electricity market player in the western Mediterranean region?

Thanks to the electricity interconnections with Algeria and Spain, Morocco is positioned as a leading electricity market player in the Western Mediterranean region and fully plays an important role both as a regional energy hub and as a transit country for cross-border electricity exchanges.

What is the first large-scale electricity storage project in Morocco?

The first large-scale electricity storage project in Morocco is the 460 MW Afourer Pumped Storage Power Station (PETS), commissioned in 2004. It consists of a hydraulic system composed of two 1.3 million-m³ water reservoirs connected by a pipeline with two hydroelectric production units between the basins.
