

It works well with Eddi relay PCB. The wire is 1.5 meters. It came quickly first class (despite Royal Mails recent strike nonsense). €9.99 all in. The comprehensive menus for setting up the relay switching rules and sensor thresholds etc. magically appear in the Eddi menus when you install (plug in the ribbon connector) the relay expansion board.

The eddi solar diverter logs all energy saving data to enable ongoing savings by optimising usage. There is also an intelligent daylight-saving time adjustment with overload and short-circuit protection for your peace of mind. Additionally, eddi is fully compliant with worldwide power grid standards and comes with a 3-year warranty. Explore eddi

I love the myenergi products so the eddi looks great but this leads me to some questions, especially around payback. Reading this thread (eddi-a-year-on-the-savings-t4159.html) it looks like the eddi could have a very long payback period but from my calculations above it looks like the eddi could have a very short payback. I am therefore ...

Introduisez un eddi dans votre maison et vous pourrez profiter pleinement de l'énergie 100% verte générée par votre système de production solaire PV ou énergie solaire. Au lieu de la renvoyer au réseau, votre investissement dans la production d'énergie devient plus efficace car notre produit intelligent eddi renvoie l'énergie à vos systèmes de chauffage.

Naast ons uitstekende technische ondersteuningsteam dat klaarstaat om al je vragen te beantwoorden, wordt eddi ook geleverd met een garantie van 3 jaar. Nadat je myenergi eddi is geïnstalleerd, vragen we je om

je individuele producten te registreren om volledig gebruik te kunnen maken van de garantie van 3 jaar. Zoek een installateur Bestel eddi

eddi product information. This product has been limited to one per order. eddi is a solar power diverter that helps you to make the most of your self generated power instead of exporting it back to the grid. Bring eddi into your home and make the most of the 100% green energy generated from your solar panel or wind generation system.

The displays on the Eddi and Zappi are also skewed, they don't display the correct values for solar PV generation, house consumption and grid consumption across the Eddi and Zappis.IMG_20190928_201938.jpgIMG_20190928_200529.jpgIMG_20190928_200501.jpgIMG_20190928_200450.jpgIMG_20190928_200445.jpg

My Eddi (200 litre tank) consumes just 1KWh per day, what water temperature is your thermostat set to. Beware of turning it too much as you'll get near boiling water. Nearly 3kWh seems reasonable energy input to me, it's the same as running the immersion for 1-hour before the Eddi was used.

Hi, My eddi has been working well for the last two years but recently has stopped heating on scheduled & manual boost and diverting power from sol ... then this suggests a fault with the Eddi, and you should contact MyEnergi support.
