We use photovoltaic solar panels to create the electricity that our machines use. Currently we have 6920 watts of PV power on our roof and in our yard, large deep cycle batteries and various controls as our power system. We use grid power to augment and back-up the solar panels by employing a large fork-lift battery charger.

For over two decades, Grenlec has advanced renewable energy in Grenada. Grenlec's Customer Renewable Energy Interconnection Programme and multi-site projects represent an innovative approach to increasing solar energy generation while overcoming the challenge of securing suitable, readily available land.

The Grenada Chocolate Company Ltd. Hermitage, St. Patrick's. Grenada, West Indies. Phone: 473-442-0050. FAQs. All GCC bars are made in our own factory in Grenada, and we do not use any nuts, seeds, or dairy in any of our recipes. We just use a little soya lecithin to make handling the chocolate a little easier in our

tropical climate.

Off grid photovoltaic systems are completely independent of the grid. The energy produced by the solar panels are collected and stored in special batteries that are rechargeable. A device called a charge controller regulates the raw DC power to prevent overcharging and protect the batteries. Batteries store energy in the form of Direct Current, therefore another device called an inverter ...
