

Is Iceland a good example of a national energy transition?

All essential conditions are in favor of Iceland to set a leading example regarding energy transition. Furthermore, the country has already extensive positive experience in such transformations. Switching from oil to geothermal heating is a perfect example of a highly successful national energy transition.

What percentage of Iceland's electricity is produced from renewable sources?

Currently, nearly 100 percent of Iceland's electricity is produced from renewable sources. However, rapid expansion in the country's energy-intensive industry has resulted in a considerable increment in demand for electricity during the last decade.

Does Iceland have geothermal water?

Furthermore, 90 percent of households are heated with Geothermal water in Iceland. As per Geopolitical Gains and Losses after Energy Transition (GeGaLo Index), the country is ranked No. 1 among 156 countries. Furthermore, Iceland will be the greatest winner after the completion of a full-scale transition to renewable energy.

PV Tech has been running PV ModuleTech Conferences since 2017. PV ModuleTech USA, on 17-18 June 2025, will be our fourth PV ModuleTech conference dedicated to the U.S. utility scale solar sector.
