

What type of energy is used in Nauru?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Nauru: How much of the country's energy comes from nuclear power?

Why is Nauru so vulnerable to solar energy?

Solar energy is the only proven renewable energy resource which could be utilised in short to medium term to reduce dependency on fuel imports for electricity generation. The country's vulnerability is also increased by its isolation from other Pacific Islands. In 2012, SPC released an energy profile of Nauru based on 36 energy security indicators.

Does Nauru have an energy road map?

Currently Nauru is working on an Energy Road Map, including action plans for the development of renewable energy and energy efficiency sufficient to significantly lower imports of diesel fuel for electricity generation.

What does imported energy mean for Nauru?

Imported energy for Nauru means fossil fuel imports. Unambiguous records of the quantity of fuel imports, their timing and the specific type of fuel imported are vital to the determination of the Nauru energy balance.

Is Nauru a member of the Pacific Islands Forum?

Nauru is a member of the Pacific Islands Forum Secretariat and most of the Pacific Island economic and environment associations such as the SPC and the Secretariat of the Regional Environment Programme (SPREP) and is a signatory to most of the economic and environment treaties that affect the Pacific.

Does Nauru use diesel fuel?

Diesel fuel and petrol are stored and distributed by NUC to all users except RONPHOS who maintains a separate diesel fuel storage facility and often purchases and imports diesel for their industrial use. Jet fuel is used only by the national airline, 9 From circa 2005 to 2009 Nauru experienced scheduled rolling black-outs.
