Our new ULTRA off grid solar systems using the latest technology are made in New Zealand and priced from \$15,995 inc GST. The base system sizes below are a guideline only. Additional panels and battery modules can be added to each base system depending on your daily loads and the sunshine hours for your region.

Household Scale: For the average New Zealand household seeking to transition to solar power and disconnect from the grid, the initial investment starts at approximately \$40,000 up to \$100,000. While being off the grid may sound enticing, it might not be the most practical solution if you can connect to the grid.
