The economy of North Korea is a centrally planned economy, following Juche, where the role of market allocation schemes is limited, although increased to an extent. [11] [12] As of 2024, North Korea continues its basic adherence to a ...

North Korea's chronic food insecurity is the product of decades of economic mismanagement and the internal and external policies of the incumbent political regime. Throughout its history, North Korea has pursued the understandable goal of national food security through an economically irrational policy of self-sufficiency.

Very little information is available due to the secretive nature of the North Korean government. The designations M-1978 and Koksan were given to the type by US military analysts, as they first became aware of it in that year in Koksan, North Korea. [6]What is known is that it is a 170 mm (6.69 in) self-propelled gun

of the open turret type.

Courts in North Korea. North Korea has a three-tiered court system with a Central Court, Provincial Courts (or Court of the Province), and People's Courts at the county level. The appeal process is based on the principle of a single appeal to the next highest court. [Source: Andrea Matles Savada, Library of Congress, 1993 \*]

This paper outlines the history of North Korea's attempts to achieve food self-sufficiency. After forty years of independence and thirty years of economic growth, the country has achieved this goal as part of a larger strategy of inwardly-based economic growth based on precepts of self-reliance. The North Koreans
