

Who is Northland Power?

Northland Power is a power producer dedicated to developing, building, owning and operating clean and green global power infrastructure assets in Asia, Europe, Latin America and North America. Our facilities produce electricity from clean-burning natural gas and renewable resources such as wind, and solar.

How many MW does Northland have?

Today, our 1,184 MW of offshore assets in operation account for 35 per cent of our total gross capacity and 43 per cent of our total annual gross generation. Northland has established itself as a leader in the global offshore wind industry.

What is Northland's history in thermal generation?

Northland's history in thermal generation extends back to 1990, when Canada's provincial utilities looked to independent power producers to support the transition from coal to natural gas. Since then, we have owned and operated a total of seven facilities over time and now operate a current portfolio of four.

How is Northland accelerating Ontario's Energy Transition?

Northland is accelerating Ontario's energy transition by leading the development of the largest battery storage project in Canada. In the Taiwan Strait, Northland is meeting ambitious local and international sustainability standards as we develop one of the largest offshore wind farms in Asia.

What is Northland doing with Gentari?

Northland has developed strong partnerships in active markets of Korea and Taiwan with Gentari. Focused on growing and developing existing and new partnerships regionally. Continuation of Northland's strategy to expand its offshore wind portfolio. Early mover in emerging offshore wind market. New market entry via local partnership.

When did Northland start its offshore wind business?

Northland began its offshore wind business in 2013 with an entry into the European market with a 60 per cent stake in the 600 MW Gemini offshore wind farm which began operations in 2017. This was quickly followed by the 332 MW Nordsee One which began operating in late 2017 and 252 MW Deutsche Bucht which began operating in early 2020.

We're a different kind of independent power producer. As developers, owners and operators who are at the forefront of the energy transition, we're uniquely positioned to leave a lasting impact in the regions where we operate. Canada is home to Northland, but our story goes beyond Toronto.
